

## Lead, Zinc and Multi-Metal Mining Project in Deqin

The Department of Land and Resources of Yunnan Province has accepted the application from Yunnan Tianda Mining for the right to explore multi-metal ores in Lirenka of Deqin County. The tenement has a site area of approximately 36.6 sq. km. The preliminary investigation performed by geological experts reported good prospects for exploring metal ores including lead and zinc. Field reconnaissance has been completed with the exploration plan having been examined and approved by specialists. Yunnan Tianda Mining will commence general geological survey once the Certificate of Approval for Exploration of Mineral Resources is granted.
